RAUWALON

Overview of benefits

Over 800 decorative designs in the non-standard range, more than 100 decorative designs in system line 2 from stock.

REHAU is the only manufacturer to precisely match the appearance of its wall seal profiles to the design of your worktop.

Watertight with all REHAU wall seal profiles

Up to seven different surfaces

Ongoing collection work - ensuring coverage of all the latest collections from leading worktop manufacturers

More than 15,000 board matches, including all leading boards and laminate collections

Now with invisible sealing lip: RAUWALON perfect-line

Suitable for a multitude of applications, from ceiling and floor profiles to caravans (system line 1)

SYSTEM LINE 1

General product features

One system line, two applications:

The smallest wall seal profile has two different applications: RAUWALON slim line for household use and RAUWALON slim line plus for professional use. Although the applications were designed for different target groups, they both have one thing in common:

RAUWALON slim line profiles

The attractive alternative to silicone joints.

RAUWALON slim line

RAUWALON slim line plus

Sealing: Thanks to its optimal sealing function, system line 1 is suitable for conventional application on worktops, but also as a high-quality alternative to silicone joints in sanitary applications, and as a seal around acrylic and ceramic moulded components, e.g. washbasins and bathtubs.

Connecting: Due to the symmetrical profile design and a newly developed moulded connecting part, system line 1 can also connect vertical surfaces to one another. This makes it suitable for ceiling and floor end strips, for example, for kitchen, caravan and DIY applications.

Adding detail: With its high-quality appearance, system line 1 enables the user to add a range of finishing touches.

Functional: The moulded pieces can be used with both slim line and slim line plus. In other words, there are two systems available for one collection of moulded pieces. This is not only functional, but also saves on storage!

SYSTEM LINE 1

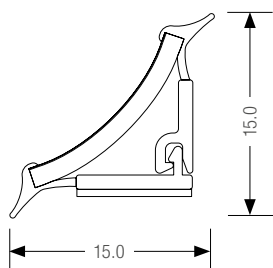

RAUWALON slim line

The fast profile on a coil:

Until now, wall seal profiles' lower and upper pieces were used as separate sections assembled as a set. RAUWALON slim line is blazing new trails!

Thanks to its single-piece shape, RAUWALON slim line is available in the following different delivery formats:

Also available as
50 metre
coils.

*From cumbersome to convenient
Delivery as 50 m coil in a box*

Delivery as cut lengths in 3 m lengths, clipped inside the box

SYSTEM LINE 1

RAUWALON slim line

Easy installation in three steps:

RAUWALON slim line comes as top and bottom parts either combined, rolled band or cut lengths. Assembly is simple, quick and practical:

1. Dispense and cut to spec with ordinary household scissors.

2. Remove the adhesive foil. Please follow the installation notes on page 23.

3. RAUWALON slim line
Press in place and you're done.

Benefits of RAUWALON slim line:

- Ideal for any location where the use of screws is not possible
- No special tools required
- Suitable for custom cutting and installation
- Strong adhesion thanks to easy positioning and pressing into place
- Simple and practical transport and shipping due to coil format
- Contiguous installation possible, i.e. no joints
- Horizontal and vertical installation possible
- No off-cuts, resulting in no waste

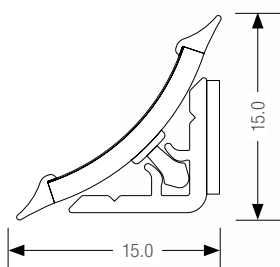

SYSTEM LINE 1

RAUWALON slim line plus

Two are better than one:

RAUWALON slim line plus is the alternative to the purely adhesive RAUWALON slim line variant.

The new **two-part** REHAU slim line generation is designed for conventional profile positioning and installation.

We also offer RAUWALON slim line plus in 4.2 m lengths for traditional profile installation.

SYSTEM LINE 1

RAUWALON slim line plus

Easy installation in five steps:

RAUWALON slim line plus comes as top and bottom pieces (separate sections) that can be assembled to form a set. Installation is quick and simple:

1. Cutting to lengths

2. Remove adhesive tape

2. Position for one-handed installation

4. Screw into place
(chip board screw
countersunk 2.5x10)

5. Clip on cover

6. Finished

Benefits of RAUWALON slim line plus:

- Most compact wall seal profile in the RAUWALON family
- Very strong mounting using screws/nails
- Single-handed installation possible due to the adhesive tape on the back
- Particularly well-suited for wooden bases, laminate, parquet, cork
- Visually identical to one-piece jointing profile when installed
- 100 % suitable for all temperature ranges and all stability applications

SYSTEM LINE 2

RAUWALON perfect line

Invisible, yet indispensable:

REHAU is the only manufacturer to offer wall seal profiles with an invisible sealing system to the worktop. The seamless transition between the worktop and the wall seal creates a continuous surface effect.

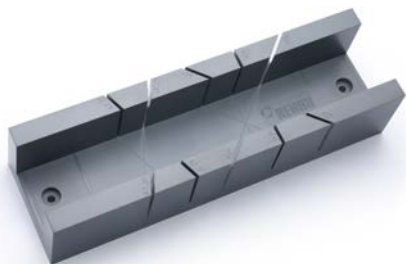

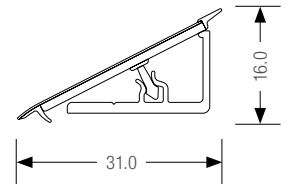

100%
matches for
Egger Zoom
worktops
ex stock

The innovative REHAU seal not only sets the tone from a functional standpoint, but also opens a completely new design dimension in the kitchen. With REHAU decoration technology, the profiles can be matched to almost any worktop design.

The selection of decorative designs in the standard range are matched with the most important worktop designs from Egger, Kronospan and Pfleiderer.

In addition, we can quickly deliver nearly all worktop decorative designs for the new RAUWALON perfect line. Contact us!

The RAUWALON mitre box is a practical installation aid with printed angle markings for easier cutting and assembly of the profiles.

The mouldings: small and streamlined to avoid interrupting the visual impression.

SYSTEM LINE 3

RAUWALON soft line

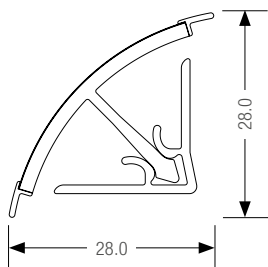

The conventional wall seal profile:

with its convex room shape, the RAUWALON soft line represents a straightforward yet visually appealing wall seal solution.

Thanks to its high-quality aluminium and stainless steel look, the RAUWALON soft line can be matched to the decorative design range of the other RAUWALON systems and REHAU products with the same aluminium films.

Other design options are always possible as non-standard solutions.

SYSTEM LINE 3

RAUWALON panel line

The intelligent splashback solution:

the trend in the kitchen sector is unquestionably towards building splashbacks. With the RAUWALON panel line, REHAU has developed an intelligent profile solution for the kitchen that enables the integration of a splashback.

Splash-back system

Use as splashback system for 16 mm splashback walls

Combination

Kitchen system with the option of a top section as an alternative to a conventional wall seal profile

SYSTEM LINE 4

RAUWALON vario line

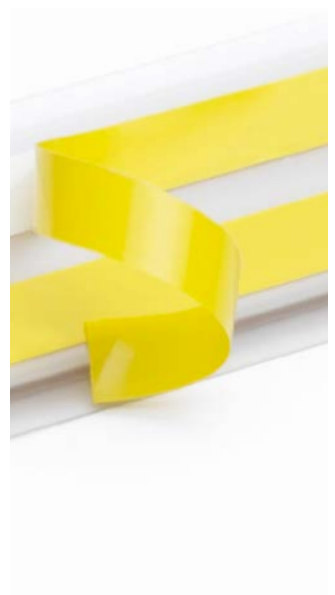

Combine it yourself:

one shape, six systems and endless design possibilities.
Variety across the board.

With RAUWALON system line 4, you can fulfil any wall seal idea you might have. From industrial production to custom interior design. Thanks to the modular concept with identical shapes, uniform

bottom sections and compatible mouldings, you can respond flexibly to all the demands of the market.

6^x
decorative options for
a single
shape!

Flexible system

Identical shapes, uniform bottom sections and compatible mouldings guarantee an unparalleled selection in surface design.

RAUWALON vario line basic

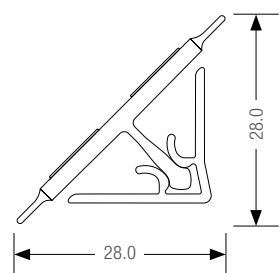

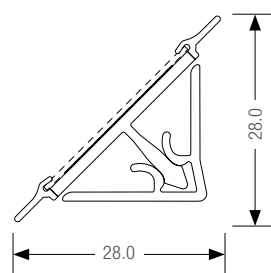

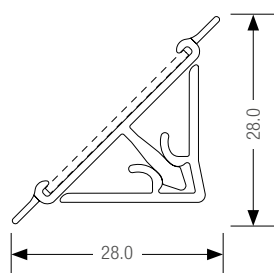

Insert the laminate strips in the top section and you're finished!

RAUWALON vario line basic+

Like basic, only with additional adhesive strips and 11 different sealing lip colours.

RAUWALON vario line solid

With two adhesive strips for the mineral material special application.

SYSTEM LINE 4

RAUWALON vario line

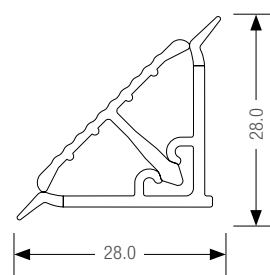

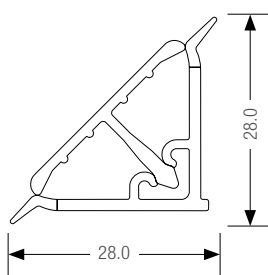

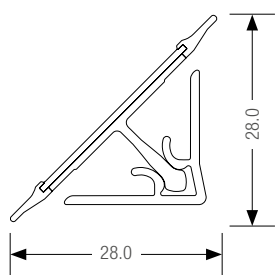

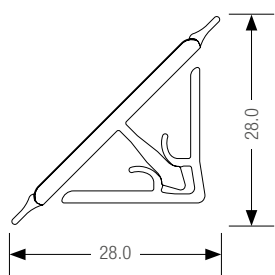

RAUWALON vario line decor
Your dream décor printed.

RAUWALON vario line magic
The metal design – smooth stainless steel or brilliant aluminium to match your appliances.

RAUWALON vario line flat
Extruded aluminium top piece with two different surfaces.

RAUWALON vario line wave
Extruded aluminium top piece with two different surfaces.

SYSTEM LINE 6

RAUWALON fine line

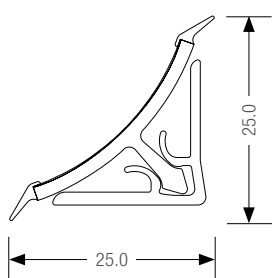

Ensure smooth transitions!

Restrained appearance, bold effect:
RAUWALON system line 6. This sleek, concave room
shape enables flowing, elegant transitions
from the worktop to the wall.

In terms of design and quality, the slim profile
RAUWALON fulfills every wish. With the magic
aluminium and brushed stainless steel decorative
designs you'll be setting trends in kitchen design.

Other design options are always possible
as non-standard solutions.

SYSTEM LINE 7

RAUWALON classic line

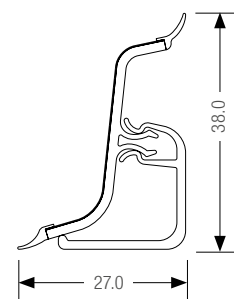

Go for the timeless classic!

The combination of elegant, timeless design and the exemplary stability provided by a high-quality aluminium insert has made RAUWALON system line 7 a classic in wall sealing systems.

The aluminium insert not only optimises the stability of the profile but is also crucial in its enhanced heat resistance. The popular and proven shape will impress you.

Improved heat-resistance

Thanks to the solid aluminium insert.

SYSTEM LINE 8

RAUWALON trend line

Create unmatched visual appeal.

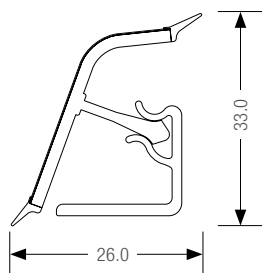

Are you looking for a decorative design that unites your worktop and wall seal profile system visually?

With the RAUWALON system line 8, it's no problem. Our wide range of standard decorative designs are matched to the most common worktop designs and caters for every wish.

We also offer more than 800 decorative designs from our non-standard catalogue, with corresponding delivery times.

More than
**160 decorative
designs**
can be delivered

RAUWALON WALL SEAL PROFILES

Overview of surfaces

RAUWALON from REHAU is the wall seal profile system with a wealth of surface effects. The printed PP foil offers diverse design possibilities and, as a result, guarantees the greatest possible flexibility. Experience a perfect interface between wall seal and edgeband in seven surfaces:

Lacquer types

Standard

Standard lacquer is the right choice for the majority of decorative prints. Our standard lacquer represents the most commonly used gloss level finish in the worktop industry.

Matt

The matt lacquer complements the majority of timber finishes, as well as being the ideal companion to stone or fantasy decorative prints.

Super matt

Super matt lacquer is the answer to current décor trends. With precious woods in mind, super matt lacquer is the perfect solution to an unsuitable gloss effect.

High gloss

Profiles with this finish fit seamlessly into the world of high gloss worktops and fronts, contributing to a high-quality appearance in the kitchen.

Embossing

Smooth

The smooth finish can be combined with any type of worktop to achieve an ideal match to the surface's gloss level.

Satin finish

A satin finish enhances the feel of the worktop. Even more precise tailoring to the worktop decorative design is possible thanks to optimum surface quality matching. The satin finish is available in matt and super matt finishes.

Lacquer embossing

With this finish, it is possible to achieve a perfect match to any of the numerous pearl embossing textures used by most worktop manufacturers.

RAUWALON WALL SEAL PROFILES

Processing instructions and product features for all systems

1. Temperature resistance

The temperature resistance of the profile system ranges from -30 °C to +70 °C. The temperature of 70 °C can be exceeded if hob units with unshielded gas flames are used. A safety clearance of 3 cm between the back edge of the pan and the front edge of the wall seal profile is therefore required to ensure that no thermal damage to the WAP occurs with gas hob units.

2. Preparation of the adhesive surfaces:

The surfaces must be dry and free of dust and grease. Loose coatings or porous surfaces must be removed or solidified. The (adhesive) surfaces should be cleaned using an unsoiled cloth and a solvent such as petrol, alcohol, ester or ketone.

3. Installation and processing instructions

To prevent chipping and poor processing ability, the profiles must be allowed to acclimatise in a heated room for at least four hours prior to installation. The processing temperature should be between 18 °C and 35 °C. For RAUWALON slim line plus, please use 2.5x10 countersunk chip board screws.

4. Jointing procedure

The optimum contact pressure is between 10-15 N/cm². This corresponds to roughly 1-1.5 kg with regard to the surface of the thumb. The profile must have pressure applied at every point to ensure full contact of the adhesive tape to the surface.

5. Final adhesion

With RAUWALON slim line, final adhesion is complete after approx. 24 hours. RAUWALON slim line plus adheres immediately.

6. Care and cleaning instructions

Clean the decorative design surfaces and sealing lips with solvents found in common household cleaning agents or mild plastic cleaners. If the use of an undiluted cleaning agent is necessary, clean with clean water immediately thereafter. Aggressive solvents such as paint thinner, acetone, MCL or MEK are not permitted for cleaning purposes as they can damage the decorative design and materials.

7. Storage

Profiles must be processed within one year.

RAUWALON WALL SEAL PROFILES

RAUWALON slim line installation tips

- Before installation: prepare the surfaces to ensure that they are dry and free of dust and grease.
- RAUWALON slim line must be positioned accurately during installation.
- The adhesive tape simplifies positioning and single-handed installation. It adheres immediately and can be damaged or cause damage to the profile if re-positioned later.
- To prevent unwanted contact and soiling of the adhesive surfaces, only approximately 50 cm of the protective foil should be removed first of all in order to place the profile.
- The remaining foil can then be gradually removed as the profile is applied.
- When installing a 90° corner, for example, the moulded pieces should ideally be applied to the profile prior to adhesion and installed together with the profile.
- When applying the second profile leg, the protective foil should initially be left on the adhesive tape.
- Simply insert the profile into the moulding at an angle, check the placement, remove the protective foil and press the profile into place.
