Invitation

2025 HOMAG Group / REHAU Edgeband Symposium

REHAU Edgeband Symposium
March 27, 2025, from 11:30 a.m.
At the premises of HOMAG Group
Homagstr. 3–5, 72296 Schopfloch

We're pleased to invite you to our Edgeband Symposium in Schopfloch, Germany on March 27, 2025. Together with the HOMAG Group and our network partners LEUCO and RIEPE, we're organizing an exciting day full of innovations, specialist presentations and discussion revolving around current developments and trends in the industry. We'd also like to invite you to our "Kantenschmaus" edgeband feast to be held afterwards.

You can look forward to an exciting mix of theory and practice on the following topics.

Appearance

Now even more natural: The new **RAUKANTEX pigmento** variant sets new standards and enhances milling radii with an authentic wood grain. Whether stone or wood decor, with RAUKANTEX pigmento the frame effect is a thing of the past.

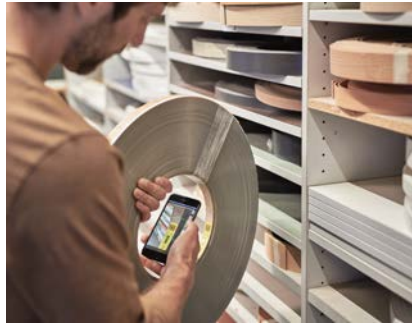

RAUVISIO cube impresses with concrete and stone surfaces that are given their characteristic look by a 45° chamfer. Thanks to innovative CNC technology, angled edgebands and 90° inside corners with zero joints can be easily implemented.

With new colors and an elegant glass look, **RAUVISIO crystal** sets trendy accents and always keeps up with the times.

Process

Handleless fronts with various profile shapes combine modern design with maximum precision. **#edgeisdigital** stands for the digital networking of machines, tools and edgebands – a must for the future. **Automated tool and edgeband management** enables precise process data acquisition and maximum production accuracy.

Finish

Reworking of **deep embossed structures**, taking into account adhesive or zero-joint processing. Perfect finish of structured stone surfaces thanks to inline sealing of the 45° chamfer.

Sustainability

With a brand-new technology used as part of the **REHAU ReTurn concept**, we are taking one step further towards sustainability: edgeband remnants are compressed to make transportation more efficient and resource-saving. This innovative solution helps to reduce waste and optimize logistics.

Timetable of the Edgeband Symposium at a glance:

Time	Address
from 11:30 a.m. Reception, lunch snack	HOMAG Group, Homagstr. 3–5, 72296 Schopfloch
from 12:30 p.m. Welcoming the participants	
from 01:00 p.m. Practical segment with live demonstrations	
from 03:00 p.m. Transfer to DEKRA Congresshotel Wart	Wildbader Str. 28, 72213 Altensteig Wart
from 04:00 p.m. Theoretical segment with presentations and discussion session	
from 06:00 p.m. Invitation to the "Kantenschmaus" dinner
