REHAU Reference

Detached dwelling in Thun, Switzerland

With passion and craftsmanship

A flair for high-quality and innovative materials is nothing out of the ordinary for the Swiss manufacturer Strasserthun. This is because the finest interiors are created here for projects all over the world. When exquisite craftsmanship meets exceptional materials and surfaces, something special is the result. „Beyond carpentry“ describes the heart of the company and the brand of international renown.

More than 1,000 materials can be found in the in-house showroom. When the RAUVISIO crystal surface material is essentially chosen for a private kitchen, there must be something special behind it.

„As a perfectionist, it was above all the appearance and the incredible coordinated design across all front elements that convinced me to use it in my kitchen.“

However, the final decision was made by my wife, who likes to adjust my designer glasses and question whether my choice also passes the practical test.“ The kitchen made of lightly glimmering glass laminate combined with wood and granite is now the jewel in Schwander’s home.
