Separating Edgeband Waste

The NESTRO Group of Companies

- ❖ Founded 1977
- ❖ 160 employees
- ❖ Ground area 77.000 m²
- ❖ Office & production space 9.600 m²
- ❖ Turnover 2022 32 Mio. €

Einsatz in vielen Branchen

Wood

Plastics

Paper &
Corrugated

Metal

Special Industries
e.g. Insulation

Recycling

45 years
> 5000 customers
in more than 80 countries

NESTRO exhaust systems are suited for wood dust, wood shavings and related materials like plastic, leather, paper dust and other industrial dust. We make standard products for standard applications up to tailor-made big-size systems for significant dust and chipping volumes.

Our Solutions:

- Bag Filters & Dedusters
- Ceiling Filters
- Intermediate Filters
- Jet- and Counter Pressure Filters
- Filter Houses
- Cyclones

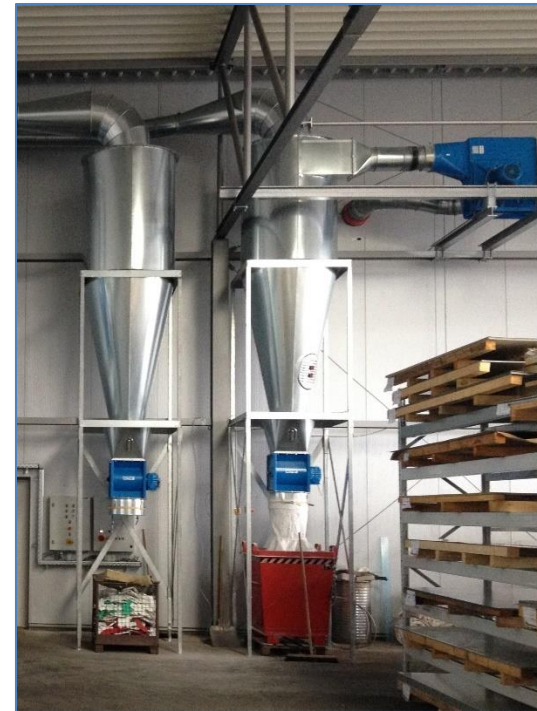

Extraction HOMAG at LIGNA Trade Fair

Material Separation Using Cyclones

Edgeband waste is also a raw material. It is recyclable and will be taken back by REHAU.

- Incurring during edge banding process to be individually collected and separated for recycling.
- Separation takes place in cyclones or separators, depending on requirements and air volumes.
- Project planning is always necessary and is carried out by NESTRO.
