Enhancing lives**

The Art of Storage

Storage solutions
www.rehau.com/rauvolet

Engineering progress

What drives the furniture industry? The continuous search for the perfect appearance, combined with the need for uncompromising reliability. Two standards which are deeply engrained in REHAU's DNA. This is the reason why we always scrutinise our existing products in order to turn something already good into something even better and simultaneously set new trends. In doing so, we always remain focused on the quality benchmark that has made us what we are today. In other words: Engineering progress. Enhancing lives.

Enhancing lives

A vertical photograph on the left side of the page shows a modern interior. In the foreground, a dark grey concrete pillar is partially visible. Behind it, a dark wood cabinet with a blue glass-effect door stands against a grey concrete wall. On top of the cabinet is a vase with dried branches and a small gold-colored geometric object. In front of the cabinet is a cork stool with a black metal base. The floor is a light grey concrete.

Enabling creativity, creating favourite places.

Storage solutions to suit any taste, without compromising on functionality – that's the aim of our 'The Art of Storage' collection. Whether it's noble matt, glass-effect or metal tambour doors or a FLIPDOOR cabinet system – you can decide which storage solution is right for you.

Matching surfaces and edgebands in the coordination guide complete the product range.

RAUVOLET tambour door and storage solutions

True to our motto 'Engineering progress. Enhancing lives.' we work on enriching your life and that of your customers just a little more with our well-thought-out innovations.

01 The world of materials and surfaces

Glass – modernity and airiness combined.

Elegance paired with perfection for light, glossy results.

When it comes to precious stones such as diamonds, quality matters. The cut is largely responsible for ensuring that the right amount of light enters the stone and is reflected. This results in the perfect interplay of light and shade.

Just as the facets make a diamond look attractive, glass surfaces and cuts also enhance pieces of furniture. The three storage solutions RAUVOLET vetro-line, RAUVOLET crystal-line and FLIPDOOR add a glossy look, but also modernity and airiness, to a room.

Matt – a timeless feel, at any time.

Meeting demanding requirements for modern aesthetics and showcasing design features in eye-catching ways.

A matt finish is one of the major design trends. It captivates with its subtle elegance.

The matt surfaces in the RAUVOLET noble matt, crystal-line and FLIPDOOR product lines make luxury design more suitable for everyday use than ever before. They have unique tactile characteristics, a wide range of colours for all design features, while still requiring particularly little maintenance. We use innovative technologies to achieve this and draw on many years of experience as a system provider.

Metal – fits any design.

Characterful surface combined with durability.

Metal has become an integral part of modern interior design and can be found in more and more homes. Metallic surfaces are not only visually striking, but also very durable and functional, making them an attractive choice for spaces where these properties are in particular demand, such as in kitchens, shops or the medical sector.

The RAUVOLET metallic-line can be perfectly combined with wood shades, stone effects, glass or matt surfaces, creating unlimited design combinations.

The classics – durable and individual.

Natural vibrancy and impressive colour schemes – inspired by nature, refined with individuality.

Bringing nature indoors remains an ongoing trend – especially in kitchens that open onto the garden. Natural furnishings help us to forget the stress and hectic of everyday life.

This is exactly where RAUVOLET decor-line comes in, with its wide range of wooden decorative designs, such as birch, maple or cherry. Those who like a classic look can rely on RAUVOLET color-line. It is often a requirement in offices and shops, but also in the private sector to be able to adapt the tambour door to its surroundings.

Made-to-measure configuration – from a quantity of 1

The innovative REHAU tambour door & FLIPDOOR configurator provides a wealth of creative design options.

You can configure storage systems for kitchens, bathrooms, offices or living spaces made-to measure - from a quantity of 1.

www.rehau.com/services

More design freedom

The drive to create unique living spaces is one of the megatrends in our society.

With RAUVOLET customised printing, REHAU now enables home and business owners to print their own images and logos on their tambour door systems and integrate them into their existing interiors just the way they want.

- **Maximum design freedom** – that can be individually matched
- **Wide range of options** – thanks to our integrated image gallery
- **Smooth, quiet running** – thanks to REHAU component technology
- **Horizontal & vertical use** – to fit any space
- **Flexible installation** – thanks to different mechanisms and track systems
- **From a quantity of 1** – via the tambour door configurator

Uncompromisingly harmonious: our product range coordination guide

Those, who value flawless results opt for REHAU, because our product range coordination guide ensures that surfaces, edgebands and storage solutions are perfectly matched in terms of appearance, tactile characteristics and materials.

This not only looks good, but also saves you time and energy – because you can get all components conveniently and reliably from one source. You can then focus on your real work: creating favourite places.

02 What awaits you

RAUVOLET tambour doors and FLIPDOOR offer you numerous ways to give your creativity free rein.

**Choose revolution, not evolution:
FLIPDOOR**

When you approach storage space as design in its own right, and go beyond mere functionality and conventional ideas, a simple overhead kitchen cabinet can be transformed into something completely new: FLIPDOOR.

The straight lines of the silhouette with 130 mm slats height – without visible track system – make a great first impression, but open FLIPDOOR cupboards are real eye-catcher, too. FLIPDOOR also offers outstanding practicality on every level: from its exceptionally smooth-running scissor movement via the space-saving opening mechanism through to the delivery of the complete cabinet.

**Coordinated
design**

with RAUVISIO crystal

Available colours:

Carcass	Front	
<input type="checkbox"/> White 154726	<input type="checkbox"/> Bianco	matt 1696L* HGL V2778*
<input type="checkbox"/> Ivory 154727	<input type="checkbox"/> Perla	matt 1697L HGL V2892
<input type="checkbox"/> Silk grey 154728	<input type="checkbox"/> Nebbia	matt 1911L HGL 1910L

**The allure of real glass:
RAUVOLET vetro-line**

The innovative RAUVOLET vetro-line real glass tambour door system represents the highest level of interior design and brings the allure of glass indoors.

The sleek track system in aluminium, stainless steel or onyx black and slats made of sophisticated real glass, mounted flush to the vertical pelmet, make this glass tambour door cabinet the highlight of any room. With its 50 mm-wide slats made out of single-pane safety glass, RAUVOLET vetro-line achieves a harmonious, two-dimensional front. That's the secret of its impressive appearance, with the play of light creating a vibrant design experience in interior settings.

Available colours:

**Smart glass
in a tambour door:
RAUVOLET crystal-line**

The RAUVOLET crystal-line tambour door system combines the aesthetic appeal of glass with all the benefits of a polymer tambour door system.

With 50 mm slats of polymer glass laminate, RAUVOLET crystal-line creates a harmonious, two-dimensional front panel that offers outstanding scratch resistance and breaking strength for everyday use. The track system is available as standard in aluminium, stainless steel or onyx black. The complete variant track system and vertical pelmet are available in RAUVISIO crystal for a colour and material match – ensures an optimal coordinated design.

Elegant and functional storage: RAUVOLET noble matt

A matt finish is one of the biggest design trends. It captivates with its subtle elegance.

RAUVOLET noble matt makes luxury designs more suitable for everyday use than ever before. Easy to use, it ensures maximum use of the available storage space and merges seamlessly with the front when closed – without a break in material or colour. The tambour doors coordinate perfectly with our noble matt RAUVISIO noir and RAUVISIO brilliant noble matt fronts.

Various tambour door profiles available

Undisturbed working: RAUVOLET acoustic-line

This patented tambour system transforms a simple cabinet into an effective sound insulator.

The tambour door system is the only one in its class that absorbs sound in a linear way across the entire frequency range – and it's especially effective in the range used for speech. In doing so, it shields office workers from irritating ambient noise. The RAUVOLET acoustic-line tambour door system combines the functional and design requirements you would expect from a modern office with highly effective sound insulation.

Available colours:

Pure white RAL9010

Aluminium 7194

Advantages of RAUVOLET acoustic-line

- **Highly effective sound insulation**
across the whole frequency range
- **3 in 1**
combines acoustic effectiveness with high-quality design and practical storage
- **High sound absorption rate**
of $\alpha_w = 0.7$
- **Sound absorption class B**
(extremely absorbent)
- **Space-saving tambour door system**
with up to 20% more efficient use of space
- **Can be ordered from a quantity of 1**
via the tambour door configurator
